Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3694

10. Claims 2-4, 6, 9, 10 and 13-22 rejected under 35 U.S.C. 103(a) as being unpatentable over The Bank Credit Card Business by American Bankers Association (Hereinafter ABA) (see PTO-892, Ref. U) in view of Bonalle et al., U.S. Patent Application Publication 2003/0041025 (see PTO-892, Ref. G) and further in view of 401(k) too nice to pinch by Eileen Ambrose (see PTO-892, Ref. X). Hereinafter Ambrose.

11. As per claim 2, ABA teaches a method of managing a credit, comprising the steps of:

(a) establishing a stored credit on behalf of a consumer, corresponding to an amount advanced by the consumer; (see pages 183-185);

(b) setting parameters for repayment of amounts borrowed from the stored credit, wherein the parameters for repayment include parameters for at least one of a payment of interest and a payment of late fees;

(c) obtaining a financial card, for providing access by the consumer to the stored credit (see pages 65-72);

(d) causing a first amount to be debited from the stored credit as a result of a financial transaction using the financial card, resulting in a remaining credit (see page 76 and Exhibit 6.9, items 2 and 3); and

(e) after step (d), paying, by the consumer, of at least one of interest and late fees on the first amount, in accordance with the parameters set in step (b). (see pages 76, 78 and Exhibit 6.9, items 14 and 15).

ABA does not explicitly teach (b) setting parameters for repayment of amounts borrowed from the stored credit, wherein the parameters for repayment include parameters for at least one of a payment of interest and a payment of late fees and wherein the at least one of interest and a late fee is added to the remaining credit to form a new stored credit available to the consumer.

Bonalle teaches (b) setting parameters for repayment of amounts borrowed from the stored credit, wherein the parameters for repayment include parameters for at least one of a payment of interest and a payment of late fees (see paragraph 11).

Ambrose teaches wherein the at least one of interest and a late fee is added to the remaining credit to form a new stored credit available to the consumer (see Ref. X).

Therefore, it would be prima facie obvious to a person of ordinary skill in the art at the time of the invention to combine the teachings of ABA, Bonalle and Ambrose to allow a consumer to set interest rates because it attracts new consumers into becoming card members as taught by Bonalle (see paragraph 3) and credit a payment of interest to an account to form a new available balance as taught by Ambrose (see Ref. X).

12. As per claim 3, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA further teaches the step (f) after step (d) and before step (e), sending a statement to the consumer for at least one of the first amount, interest or a late fee, in accordance with the parameters set in step (b) (see page 76).

13. As per claim 4, ABA teaches the method of claim 3 as described above. ABA further teaches wherein, the parameters set in step (b) specify billing the consumer for

Art Unit: 3694

at least one of interest and a late fee only if the first amount is not paid in full prior to a deadline set by the parameters (see pages 52, 76-77 and Exhibit 6.9, item 6).

14. As per claim 6, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA does not explicitly teach wherein, the parameters set in step (b) permit the consumer to set an interest rate charged on at least the first amount.

Bonalle teaches wherein, the parameters set in step (b) permit the consumer to set the interest rate charged on at least the first amount (see paragraph 11).

Therefore, it would be prima facie obvious to a person of ordinary skill in the art at the time of the invention to combine the teachings of ABA, Bonalle and Ambrose to allow a consumer to set interest rates because it attracts new consumers into becoming card members as taught by Bonalle (see paragraph 3).

15. As per claim 9, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA further teaches wherein the first amount is debited from the stored credit in step (d) as the result of a purchase made using the financial card in a retail establishment (see page 76 and Exhibit 6.9, items 3, 11, 12 and 16).

16. As per claim 10, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA further teaches wherein the paying in step (e) further includes repaying at least a portion of the first amount, and wherein the at least a portion of the first amount is additionally added to the remaining credit to form the new stored credit (see page 76).

17. As per claim 13, ABA teaches the method of claim 3 as described above. ABA further teaches (g) debiting a second amount from the remaining credit, using the financial card (see page 76, Exhibit 6.9).

18. As per claim 14, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA further teaches (h) debiting a finance charge from the stored credit if the parameters set in (b) are not met (see page 78).

19. Claim 15 recites similar limitations to claim 2 and thus rejected using the same art and rationale in the rejection of claim 2 as set forth above.

20. As per claim 16, ABA, Bonalle and Ambrose teach the method of claim 15 as described above. ABA further teaches wherein said parameters are set in step (b) by the consumer (see page 52).

21. Claim 17 recites similar limitations to claim 3 and thus rejected using the same art and rationale in the rejection of claim 3 as set forth above.

22. Claim 18 recites similar limitations to claim 4 and thus rejected using the same art and rationale in the rejection of claim 4 as set forth above.

23. As per claim 19, ABA, Bonalle and Ambrose teach the method of claim 15 as described above. ABA further teaches (h) debiting a finance charge from the stored credit if the parameters set in (b) are not met (see page 78).

24. Claim 20 recites similar limitations to claim 6 and thus rejected using the same art and rationale in the rejection of claim 6 as set forth above.

25. Claim 21 recites similar limitations to claim 10 and thus rejected using the same art and rationale in the rejection of claim 10 as set forth above.

26. As per claim 22, ABA teaches the financial institution managing savings, comprising:

a record of a credit stored by a consumer at the financial institution (see page 59);

a debit card affiliated with the financial institution, use of which provides the consumer with access to said stored credit (see page 65-72); and

a billing system for managing said stored credit according to said parameters set by the consumer, wherein said billing system debits said stored credit in accordance with purchases made using said debit card, said billing system generating a statement detailing said debits to said stored credit and any interest or late fees due in accordance with said parameters, said billing system further debiting an amount of said debits from the record of the stored credit and crediting said stored credit in the amount of any repayments of debits, payments of late fees and payments of interest made by the consumer; and (see Exhibit 6.9)

the financial institution transmitting said statement to the consumer (see page 81).

27. Claims 5, 11 and 12 rejected under 35 U.S.C. 103(a) as being unpatentable over The Bank Credit Card Business by American Bankers Association (see PTO-892, Ref. U) [Hereinafter ABA] in view of Bonalle et al., U.S. Patent Application Publication 2003/0041025 (see PTO-892, Ref. G) in view of 401(k) too nice to pinch by Eileen Ambrose [Hereinafter Ambrose] (see PTO-892, Ref. X) and further in view of Orchard Credit Cards (see PTO-892, Ref. V) [Hereinafter Orchard Bank].

28. As per claim 5, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA does not explicitly teach wherein, the parameters set in step (b) permit the consumer to set the maximum amount the stored credit can be debited by the first amount and subsequent amounts.

Orchard Bank teaches wherein, the parameters set in step (b) permit the consumer to set the maximum amount the stored credit can be debited by the first amount and subsequent amounts (see Ref. V).

Therefore, it would be prima facie obvious to a person of ordinary skill in the art at the time of the invention to combine the teachings of ABA, Bonalle and Ambrose and Orchard Bank to set maximum credit limits that can be debited because it prevents a consumer from spending more money than what is currently on deposit in a linked savings account.

29. As per claim 11, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA does not explicitly teach wherein the stored credit is a savings account in a bank, the savings account being managed in accordance with the parameters set in step (b), the bank providing the financial card to the consumer.

Orchard Bank teaches wherein the stored credit is a savings account in a bank, the savings account being managed in accordance with the parameters set in step (b), the bank providing the financial card to the consumer (see Ref. V).

Therefore, it would be prima facie obvious to a person of ordinary skill in the art at the time of the invention to combine the teachings of ABA, Bonalle and Ambrose and Orchard Bank to link a savings account to a credit card because it prevents a consumer

Art Unit: 3694

from spending more money than what is currently on deposit in the linked savings account.

30. As per claim 12, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA teaches wherein the bank providing the financial card and statement to the consumer. ABA does not explicitly teach wherein the stored credit is stored in a savings account in a bank, the savings account being managed in accordance with the parameters set in step (b).

Orchard Bank teaches wherein the stored credit is a savings account in a bank, the savings account being managed in accordance with the parameters set in step (b), the bank providing the financial card to the consumer (see Ref. V).

Therefore, it would be prima facie obvious to a person of ordinary skill in the art at the time of the invention to combine the teachings of ABA, Bonalle and Ambrose and Orchard Bank to link a savings account to a credit card and providing a statement and credit card because it allows a consumer to make financial transactions using a credit that is linked to a savings account and receive monthly statement showing the transactions.

31. Claims 7 and 8 rejected under 35 U.S.C. 103(a) as being unpatentable over The Bank Credit Card Business by American Bankers Association (see PTO-892, Ref. U) [Hereinafter ABA] in view of PSECU Capitol Card (see PTO-892, Ref. W) [Hereinafter PSECU].

32. As per claim 7 and 8, ABA, Bonalle and Ambrose teach the method of claim 2 as described above. ABA does not explicitly teach wherein, the parameters set in step (b)

permit the consumer to set a monthly minimum payment for repaying at least the first amount and wherein, the parameters set in step (b) permit the consumer to set the monthly minimum payment as a percentage of the funds owed.

PSECU teaches wherein, the parameters set in step (b) permit the consumer to set the monthly minimum payment for repaying at least the first amount and wherein, the parameters set in step (b) permit the consumer to set the monthly minimum payment as a percentage of the funds owed (see Ref W).

Therefore, it would be prima facie obvious to a person of ordinary skill in the art at the time of the invention to combine the teachings of ABA and PSECU to allow the consumer to set the monthly minimum payment based on a dollar amount or a percentage of balance owed because it allows the consumer flexibility in payments and convenience.

Conclusion

33. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
